Open

Open a Local Project
Navigate and open an existing project

Clone or Check Out
Open from source control repositories like GIT, TFS or SVN

New Project

Process
Start with a blank project to design a new automation process.

Library
Create reusable components and publish them together as a library. Libraries can be added as dependencies to automation processes.

New from Template

Orchestration Process
Implement a process through service orchestration and human intervention as well as through long-running transactions.

Background Process
Create a process that does not require user interaction and can run as a background process. Multiple background processes can run concurrently on the same Robot.

**Robotic Enterprise Framework**
Create a transactional business process that follows best practices for large scale deployments.

Trigger Based Attended Automation
Trigger an automation in response to a mouse or keyboard user event.

Transactional Process
Model a process as a flowchart diagram.
